The contract will consist of a one-year base period with up to four (4) optional one-year renewal periods, not to exceed a maximum total of five (5) years. Optional renewals shall be approved only after satisfactory analysis is completed by GCED at the end of each twelve (12) month period of the work performed by the contractor.

A routine schedule will be determined between GCED and the awarded vendor before a contract is signed that will work for both parties and become part of the awarded contract.
7. The requested bid price is per bi-weekly maintenance. Neither the County nor the contractor can predict the number of maintenance days that will be required, and the growing season may be longer or shorter than eight (8) months depending on the weather. A total of 16 bi-weekly maintenance “cuts” are included in this bid. Additional maintenance beyond the estimated two (2) per month, must be approved in writing by GCED prior to the cut. - c) No plea of ignorance of conditions that exist or may hereafter exist on the site of the work, or difficulties that may be encountered in the execution of the work, as a result of failure to make necessary investigations and examinations, will be accepted as an excuse for any failure or omission on the part of the Contractor to fulfill in every detail all the requirements of the contract documents and to complete the work for the consideration set forth therein, or as a basis for any claim whatsoever.

The task order and the Contract shall govern the Contractor's and COUNTY's rights and obligations with respect to that task order to the same extent as if the task order were completed during the Contract's effective period.
- e) There is no limit on the number of task orders that may be issued against this Contract, if and when needed.
- f) In the event that fewer direct labor hours or estimated total costs are used by the

Contractor accomplishing the prescribed work under individual task orders than were obligated by the executed task orders, the Contractor shall generate a letter addressed to the Project Manager requesting the closure of the task order. The parties agree that any downward price/cost adjustment shall reflect actual work performed.

20. Fuel Cost Factor:

For price adjustment purposes, indicate a decimal or percentage factor for calculating the fuel cost portion of the price per segment of the parks section that you are bidding to maintain. The Fuel Cost Factor will remain constant throughout the contract term. Place the percentage on page twenty-nine (29), line item number three (3) of the Mandatory Bid Submittal Form.

21. Cost of Fuel Price Adjustment:

I. Cost of Fuel Price Adjustment

a) Segment unit prices shall remain firm through the first contract year. To accommodate changes in fuel costs, prices may be adjusted annually on the contract anniversary date based on the most current Charleston, SC Average Diesel Rack as reported by SC State Contract fuel pricing history. The contractor is expected to manage costs associated with labor, overhead and general sales and administration for the life of the original agreement. No price change related to cost issues other than fuel cost will be considered as a basis for price adjustment.

b) A fixed margin to be used in price adjustment calculations shall be calculated by subtracting the fuel cost (determined from the fuel cost factor) from the original bid unit price:

$$\text{Fuel Cost} = \text{Bid Unit Price} \times \text{Fuel Cost Factor}$$

$$\text{Fixed Margin} = \text{Bid Unit Price} - \text{Fuel Cost}$$

For price adjustments, this fixed margin shall be utilized to calculate subsequent fuel costs relative to the contract unit price in effect at the time, regardless of the contractor's actual fuel cost:

$$\text{Fuel Cost} = \text{Contract Unit Price} - \text{Fixed Margin}$$

c) The benchmark fuel price index for the purpose of calculating price adjustments for the agreements resulting from this bid shall be the Charleston, SC Average Diesel Rack as reported by SC State Contract fuel history, as published in SSCO. The base value to be used for calculating the initial price adjustment shall be the index published on the week of the initial contract. Adjustments shall be calculated according to the percentage change, up or down, as reflected in this index. Only the fuel cost component of the contract unit price shall be adjusted. The adjusted fuel cost shall be calculated by one of the following formulas:

Adjusted up in accordance with the percent increase in the index value:

$$\text{Adjusted Fuel Cost} = \text{Fuel Cost} + (\text{Index Value \% Increase} \times \text{Fuel Cost})$$

OR

Adjusted down in accordance with the percent decrease in the index value:

Adjusted Fuel Cost = Fuel Cost - (Index Value % Decrease x Fuel Cost)

II. The new unit price is the sum of the fixed margin and the adjusted fuel cost:

New Unit Price = Fixed Margin + Adjusted Fuel Cost

- a) All calculated price adjustments shall be effective on the first calendar day of the "price adjustment" month.
- b) All price adjustment calculations of less than 1 % shall not be implemented. Subsequent price changes shall be calculated by comparing the current index value to the index value last used to calculate an allowable price change, which may result in cumulative increases or decreases of more than 1 %.
- c) The calculation method described herein shall not change for the life of the agreement.
- d) All communications regarding price adjustments shall be directed to:

22. Evaluation & Award

To determine the lowest and most responsible bidder, in addition to cost, the following items shall be considered: references and past history of performance on similar contracts, amount, type, capacity, and age of existing grass mowing equipment in bidder's current inventory, and the vendor's capability to perform the work assigned with sufficient equipment and labor.
