

632. **Solar Energy Facility Floating District** *(Amended Ord. 2018-36)*

**Intent.** The purpose of the Solar Energy Facility Floating District is to establish appropriate locations for commercial scale solar facilities. These facilities are recognized by the County as being important energy providers now and in the future. Additionally, the County recognized that provisions should be established that protect nearby properties from any negative effects such a facility may produce.

632.1 See Article III, Definitions and Article XX Requirements by Overlay Zone for Solar Energy Facility Floating District provisions.

632.2 Underlying Zoning District. In the event a Solar Energy Facility Floating District is established, the established underlying zoning district regulations shall apply in addition to the Solar Energy Facility Floating District provisions..
